

“The sea is harsh and free.”

Victor Hugo

The shipbuilding specialists

We are the experts in marine engineering, technologies as well as legal and contractual aspects, **making us a strong partner for companies wishing to expand their international reach in the shipbuilding industry.**

For nearly 40 years, **our clients have trusted in us** to provide quality translation services. No project is too big or too small.

THE MARINE HUB

We offer a service tailored to your needs:

- A dedicated team, comprised of project managers overseeing 20 full-time translators specialised in shipbuilding and 50 technical translators and interpreters who are highly experienced and qualified in the various areas.
- For each client, we create a comprehensive, customised term base, which we continually update and manage, allowing us to maintain specific terminology and build a brand.

We implement stringent project management, quality assurance and confidentiality procedures to ensure we have the relevant expertise to meet the demands of the shipbuilding industry at large.

Military

SCORPÈNE-CLASS SUBMARINE

As a long-term partner of the leading naval defence group, we have extensive experience and a proven track record in this sector.

Civil

MSC PREZIOSA

We translate for the largest passenger ships constructed at the Saint-Nazaire shipyard.

Our expertise also extends to recreational boating and sailing.

What a year at the Marine Hub looks like:

More than **15 million** words translated

Amounting to more than **350,000** pages

And **1,200 hours** of DTP

More than **90** specialised translators

More than **20** specialised interpreters

More than **2 GB** of translation memories in total

Our expertise includes all areas of the shipbuilding industry and renewable marine energy sector

Marine engineering, boilermaking and sheet metal, welding, electronics, hydraulics and piping, engines, motorisation, propulsion, communication and navigation systems, layout, logistics, arms, staff training and maintenance.
